***"I love healthy food but I couldn't live without chocolate."***

*Cindy Crawford*

25 years ago, Cosentino launched Silestone®, an innovative material that revolutionized the design of kitchen and bath surfaces around the globe.

To celebrate almost 3 decades of hard work and innovation, we are launching a new campaign in which, once again, we are surrounded by great personalities from the world of sport, culture, kitchen and fashion. Men and women who, thanks to their determination and professionalism, have arrived to the top of their careers and, as complicated as it is,

have managed to start a "Top" campaign starts with well-known and valuable personalities. Surprisingly, Cindy Crawford is a top woman and model to earth and very close to success for this American woman and it is very similar to her values: a solid family and humility.

In an exclusive interview, Cindy Crawford shares her brand-new image of "a top woman and model" and her greatest passion.

# Silestone® Eco Line Colour Series

A Series of Colours Created from Recycled Materials

The new ECO Line Colour Series is an innovative collection of colours, more than 50% having been made from recycled materials.

- ▶ Porcelain tiles, sinks and other decorative elements
- ▶ Secondhand window panes, containers and glass bottles
- ▶ Porcelain stoneware made from tile fragments
- ▶ Petrified ash, combustion residue from blast furnaces.

Even 94% of the water used during the manufacturing process is recycled.

Colours which combine sustainability, design and durability have given rise to a new category in this type of material, a sustainable alternative to surfaces for the architectural market.

The colours in the ECO Line Colour Series have been the result of an exhaustive research and development project which has reinvested a large percentage of its profits in the acquisition of new technologies with which it has created a new line of recycled surfaces.

All the manufacturing process comply with our highest standards, such as Cradle to Cradle certification, which not only ensures the product is sustainable but also everything included in the production process.
